

# The Tag

## Dual Interface Temperature Logger

Tag T1 is a temperature logger in the form factor of a shipping label. It logs the temperature of your shipments throughout its journey independent of carriers and transport methods. Simply stick it onto your cargo and start it.

The Tag can be configured, started, and read with your NFC enabled smartphone or Tag Read RFID reader.

All temperature data will be available online immediately after each reading in Tag Portal where you can also configure the behaviour of the Tag, and who has access to read and/or view the Tags data.

Tag ordering codes:

T1-WHT – TAG T1 in white colour

T1-GRN – TAG T1 in green colour

### Features and benefits:

- Easy to use
- Low cost
- Low initial infrastructure investment
- Recyclable as common waste (WEEE)
- No dangerous substances (RoHS)
- Air freight safe (no lithium batteries)
