

# Tag Portal

## Cloud Based Data Logger Management Platform

Tag Portal is our free-to-use, cloud-based platform that stores all your data from the Tag. Every reading from Tag Tap, Tag Gate and Tag Read instantly and automatically uploads to the portal, which is accessible from your laptop, desktop or tablet.

Use our portal to set up temperature logger configurations and custom data integrations. View your logger's complete history, including temperature progression and location.

Access Tag Portal: [portal.tag-sensors.com](https://portal.tag-sensors.com)

### Features and benefits:

- Easy to use
- Free
- Access temperature and location data
- Configure Tags
- Generate reports
- Set alerts
- Manage access
- API integration

Temperature table and graph

Configure Tags

Tag interaction locations

Automatic alarms

AWS Cloud

Safe temperature data

ERP integration through API

All data gathered
